

Clear Water Irrigation And Drainage Surpasses 270 Reviews With 4.8-Star Rating

August 25, 2026

JACKSONVILLE, FL - August 25, 2026 -

Clear Water Irrigation and Drainage, a Jacksonville-based irrigation and drainage contractor serving Northeast Florida, has surpassed 270 customer reviews while maintaining a 4.8-star average rating on its Google Business Profile. The milestone reflects sustained demand for the company's irrigation and drainage work across residential and commercial properties throughout the region.

The company provides lawn sprinkler irrigation system installation, upgrade, and rerouting services, along with French drainage, downspout drainage, and surface drainage installation. These offerings address two common challenges for Florida property owners: distributing water efficiently to keep landscapes healthy and managing excess water to prevent pooling, erosion, and damage to foundations.

Irrigation rerouting has become a frequent request as homeowners install swimming pools or reconfigure their landscapes, requiring existing sprinkler lines to be adjusted for continued coverage. On the drainage side, French drains, downspout drains, and surface drains help redirect water during the heavy rainfall

common to the area, protecting both structures and yards.

The reviews accumulated by Clear Water Irrigation and Drainage span a range of projects, from new system installations to targeted repairs and upgrades. According to the company, the consistency of its rating over more than 270 entries points to steady service quality rather than a single positive period.

Jon Haney of Clear Water Irrigation and Drainage attributed the response to the people carrying out the work and the standards they hold. "People tend to leave positive reviews when the work speaks for itself," Haney said. "Our teams are highly trained, and they genuinely enjoy what they do. That shows up in the quality of every installation and every repair. When customers see careful work and clear communication, they want to share that experience with their neighbors."

Haney added that feedback has also shaped how the company operates. "Reading through our reviews reminds the whole team why the details matter, from how a system is designed to how a drain is placed," he said. "It keeps everyone focused on doing the job right the first time." The volume of Clear Water Irrigation And Drainage reviews reflects the company's presence across St. Augustine, Jacksonville, Orange Park, and the surrounding areas of St. Johns, Duval, and Clay counties.

The company emphasizes sustainable practices and efficient water usage, including smart technology intended to conserve water while maintaining healthy lawns. Its drainage services are designed to manage stormwater and reduce soil erosion, contributing to the long-term stability of the landscapes it serves. The Clear Water Irrigation And Drainage experts tailor each project to the local climate, considering factors such as landscape layout, plant types, and sun exposure when designing irrigation systems, and site grading and water flow when planning drainage solutions.

Clear Water Irrigation and Drainage is a local irrigation and drainage contractor based in Jacksonville, Florida. The company offers irrigation system installation, rerouting, repair, and upgrade services, along with yard drainage, downspout drain, French drain, and surface drain installation for residential and commercial customers throughout Northeast Florida. The company serves properties across St. Johns, Duval, and Clay counties and focuses on delivering services tailored to the specific needs of each property.
